

UNI Bridge

A universal bridge

<https://ub.rwa-wallet.com>

@HelloRWA

Problem

- * Different bridge with different assets support
- * Rare NFT bridge supported
- * Don't have a standard to bridge different kinds of assets

(Native/ERC20/ERC721/ERC1155)

Solution

- * **Compose as much bridge tech into one platform**
- * **NFT bridge supported, including ERC721 and ERC1155**
- * **Provide a standard for the bridged assests: UNIBridge Protocol**
- * **Support assets: Native Token, ERC20, ERC721, ERC1155**

Business Model

- * Take 0.01% of tx fee
- * Provide in-house DEX for bridged assets and earn trading fee
- * Provide assets farming pool for users
- * Provide new assets launchpad
